BANTAMUMS - "Say it with Flowers every day"

You will be hearing a lot about the Bantamum Crop. It is a new procedure of developing Mums to provide smaller flower units - short stemmed pieces that are ideally adapted for everyday home and "do it yourself" arrangements.

Mr Cloy Miller, Yoder Bros Chrysanthemum growers, has long advocated the practicability and salability of cut flowers as an important part of our everyday living and home decor.

Flowers for everyday home use are not expensive. Chrysanthemums bring the beauty of nature into the home for a week at less cost per day than package of smokes. Yoders can suggest a "Mum Program" that will bring blooms on weekly basis. The Bantamum procedure is practical for most areas - if it will not work in your clime, we will let you know. See planting chart enclosed.

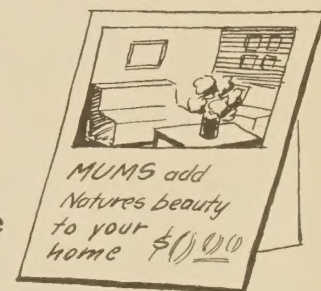

The Mum is traditional "fall football" flower. But real opportunity for selling comes with Mums for those special football week end dinners, parties, buffets. "Talking Banners" on your windows, delivery trucks suggest - "Party time is Mum time" . . . help keep the register ringing during off fall weeks.

"Mum of the week" is easy mail promotion - use charge names from Easter, Mother's Day, Memorial Day. The 2¢ postal is reasonable in cost, a friendly way to tell how cut flowers add charm and beauty to everyday living. Feature a special price - postal cards that arrive Thursday-Friday bring in week-end buyers.

Make "Talking Signs" with Magazine Clippings

The Home & Garden Magazines are heavy with color photos of room arrangements that show flower settings. Paste on display card with color flower pictures. Don't be afraid to price - suggest available varieties. The "Mum" with its exquisite flower is tops for creative home arrangements.

Order now for late July, Aug, Sept bench plantings. Be ready for Sept, Oct, Nov selling time! See special planting sheet enclosed. Some favorites for Bantamum Crop:

New INVENTION

*fertilizer made special for
Florists and Growers!*

ABC proudly brings this greatest of fertilizer discoveries to our florist and grower friends. Research scientists worked diligently in the O M Scott & Sons laboratories for 10 years. Now ABC PRO GRO and PRO-N25 combine all advantages of both chemicals and organics—without the disadvantages of either.

Perfect Feeding

Non-burn — because of exclusive chemical interlock of plant food sources

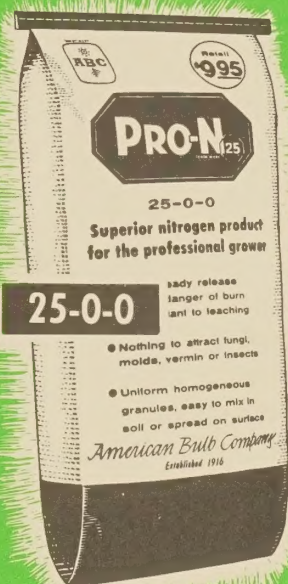

Slow-steady release — day by day over 3 to 4 months as plants use nutrients

Uniform — homogenous granules, easy to mix into soil or to broadcast on surface

Nothing to rot or decay — does not attract fungi, molds, vermin or insects

Mild acidifier — gentle, sure action

Clean, crisp, no dust — easy to use accurately and correctly
